## 2. TARGET ANIMAL SAFETY and DRUG EFFECTIVENESS

Under the provisions of the Federal Food, Drug and Cosmetic Act, as amended by the Generic Animal Drug and Patent Term Restoration Act (53 FR 50460, December 15, 1988, First GADPTRA Policy Letter) an abbreviated new animal drug application (ANADA) may be submitted for a generic version of an approved new animal drug (pioneer product). Phoenix Scientific, Inc. is supplementing their ANADA for the addition of the persistent activity claims. Based upon the formulation characteristics of the generic product, Phoenix Scientific, Inc. was granted a waiver on from conducting an *in vivo* bioequivalence study with Ivermectin® Pour-On for Cattle. The generic product was approved on July 6, 1998. The three-year exclusivity period for the additional claims granted to the pioneer product ended on June 4, 2000. No new data was required for the additional new claims.

3. HUMAN FOOD SAFETY:

When a waiver from the requirement of an *in vivo* bioequivalence study is granted, the withdrawal times are those previously assigned to the pioneer product. The withdrawal time for ivermectin pour-on is established under 21 CFR 524.1193(d)(3) - 48 days in cattle. Therefore, no human food safety information is required for the approval of the supplement.

4. AGENCY CONCLUSIONS:

This is an Abbreviated New Animal Drug Application (ANADA) filed under section 512(b)(2) of the Federal, Food, Drug and Cosmetic (FFD&C) Act.

Under the Center's supplemental approval policy (21 CFR 514.106(b)(2)), this is a Category II change providing for the addition of new claims to the previous approved label. The approval of this change is not expected to have any adverse effect on the safety or effectiveness of this new animal drug. Accordingly, this approval did not require a reevaluation of the safety and effectiveness data in the parent application.
