

FINDING OF NO SIGNIFICANT IMPACT

for

Pulmotil® 90 (Tilmicosin) Type A Medicated Article For Use In Swine

NADA 141-064

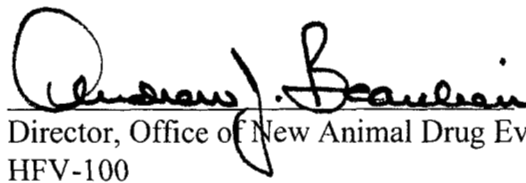

Elanco Animal Health
Indianapolis, IN

The Center for Veterinary Medicine has considered the potential environmental impact of this action and has concluded that this action will not have a significant effect on the quality of the human environment and that an environmental impact statement therefore will not be prepared.

Elanco Animal Health is requesting approval of a Type A medicated article containing tilmicosin for use in the control of bacterial pneumonia in swine. The dosage will be 181.8 to 363.6 g/ton of feed. The article will be available only by a Veterinary Feed Directive.

In support of their application, Elanco has provided an environmental assessment (EA), dated April 1996. The information provided in the EA is adequate to conclude that the manufacture and use of Pulmotil® 90 Type A medicated article are not expected to have a significant impact on the environment.
